

## Shepherd Pay

Simple payment processing right from  
your practice management software!

We designed **Shepherd Pay** to save your front desk time and reduce the risk of human error.

Gone are the days where you capture invoice totals from your software, manually key them into a credit card terminal and then manually enter them back into your software, all while the client is waiting in front of you. Using Shepherd Pay, with one click, you've charged the client and updated your records.

### Streamlining your workflow benefits everyone

#### At the front desk:

- Simplify the client check-out process
- Let your client use their preferred payment method

#### In the back office:

- Much less opportunity for human error
- More accurate End of Day reports

#### At the end of a tugging leash:

- Less time with a wiggly pet at the front desk
- Easy access to past invoices and receipts

# From invoice to receipt

Our all-in-one solution is built to work the way you do

Collect payments securely from any of our easy-to-use methods:\*

## Store credit cards

Expedite future client checkouts

## Online payments

Allow your clients to pay from their pet owner portal

## USB terminal

Swipe cards from anywhere

Shepherd Pay is ready to go from the start. No extra implementation time and no added fees. And your first USB terminal is free!

| Competitive flat rates               |        |
|--------------------------------------|--------|
| Visa/MC/Disc/AmEx                    | 2.89%  |
| Transaction Fee                      | \$0.25 |
| <b>That's it!</b><br>No monthly fees |        |
